

AMAN KUMAR

Java Backend Developer

Bhiwani, Haryana | +91 8002219076 | amanbth7974@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Java Backend Developer and Pre final-year CS student with hands-on experience building scalable RESTful APIs using the Spring Framework. Proficient in **core java**, **object oriented programming**, **programming**, and **software development life cycle** practices. Skilled in **jdbc** fundamentals, **relational databases**, and **servlets** concepts alongside Spring Boot, Spring Security, Spring Data JPA, and JWT authentication. Experienced in test-driven development with JUnit 5 and Mockito. Strong **communication** and **teamwork** skills, with a focus on clean backend architecture and Generative AI integration.

Technical Skills

Languages: Java (Core & Advanced), SQL

Spring Ecosystem: Spring Boot, Spring Data JPA, Spring Security, JWT Authentication, Spring AI

Testing: JUnit 5, Mockito — Unit Testing, Integration Testing, Service & Repository Layer Mocking

API & AI: RESTful API Design, Google Gemini API, Generative AI Integration

Database: MySQL, Hibernate, JPQL

Tools & Platforms: Postman, Git, GitHub, IntelliJ IDEA, Eclipse, Maven

Projects

AI-Powered Dynamic Quiz Generator [[GitHub](#)] Apr 2026 – Present

Spring Boot · Google Gemini API · Spring Data JPA · JUnit 5 · MySQL

- Built an intelligent quiz app integrating **Google Gemini API** for automated real-time question generation by topic and difficulty level.
- Designed backend API logic for Gemini responses, managing latency and reliably parsing edge cases using **programming** best practices and clean **object oriented programming** structure.
- Managed quiz history and score persistence using **Spring Data JPA** with MySQL, ensuring data integrity across **relational databases** models.
- Achieved robust test coverage across AI integration and service layers using **JUnit 5** and **Mockito**.

Shopping Cart Backend System [[GitHub](#)] Jan 2026 – Feb 2026

Spring Boot · Spring Security · JWT · JUnit 5 · MySQL

- Developed a **scalable RESTful backend** for an e-commerce platform with full CRUD for products, orders, and user management using Spring Boot and Spring Data JPA.
- Implemented **role-based access control** (RBAC) using Spring Security with JWT, securing all API endpoints.
- Wrote comprehensive **unit and integration tests** using JUnit 5 and Mockito across service and repository layers.
- Designed and tested all API endpoints using **Postman**; optimized MySQL queries via **custom JPQL** reducing data fetching overhead.

Education

BRCM College of Engineering and Technology, Bahal, Bhiwani, Haryana Expected Jun 2027

- B.Tech in Computer Science and Engineering / CGPA: 7.5/10 / 3rd Year — 6th Semester
- **Relevant Coursework:** OOP (Java), Data Structures & Algorithms, Operating Systems, DBMS

Certifications & Achievements

- **Spring Boot Certification** — Advanced mastery of the Spring Ecosystem
- **Generative AI Certification** — Java-based AI integration using Google Gemini API

Additional Information

Languages: English, Hindi

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Self-motivated Learner
